PART I

AMPLITUDE MODULATION BROADCASTING STATIONS

ACCORDING TO COUNTRY AND CITY

(Includes World Time Chart)

INFORMATION CORRECTED TO

1 MARCH 1965

For sale by the Superintendent of Documents, U.S. Government Printing Office
Washington 25, D.C. Price $2.50

FOREWORD

This edition of BROADCASTING STATIONS OF THE WORLD, current as of 1 March 1965, lists all reported radio broadcasting and television stations, with the exception of those in the United States of America which broadcast on domestic channels.

Part I (Blue Cover) AMPLITUDE MODULATION broadcasting stations: Information is indexed alphabetically by COUNTRY and CITY. Within a city, stations are listed in ascending order of frequency. Multiple listing of the same station on different frequencies does not necessarily indicate the number of transmitters, since one transmitter may operate on different frequencies at different times. Other information includes call letters and/or station name, power, wavelength, frequency, status of frequency or transmitter and ownership.

Part II (Green Cover) AMPLITUDE MODULATION broadcasting stations: Information is indexed according to FREQUENCY in ascending order.

Part III (Maroon Cover) FREQUENCY MODULATION broadcasting stations: Two sections, one indexed alphabetically by COUNTRY and CITY, and the other indexed by Frequency in ascending order, include the same elements of information as Parts I and II.

Part IV (Brown Cover) TELEVISION stations: Two sections, one indexed alphabetically by COUNTRY and CITY, and the other indexed by FREQUENCY in ascending order, include the same elements of information as Parts I, II, and III plus additional data to distinguish audio, video, polarization, and other technical factors which may apply.

The column headings covering all data listed in Part III are defined as follows:

COUNTRY: The name of the country in which the facility is located. Owing to format limitations of the data-processing equipment, the popular rather than the full official name is used for some countries. Colonies, protectorates, mandates and overseas territories are generally treated as countries for the purposes of this publication.

CITY: The announced location of the station. It is usually the studio location, since most FM transmitters are placed upon the highest location in the area in order to obtain more widespread coverage. Wherever possible, the transmitter location follows the name of the city. In a few cases the area where the transmitter is located is given on the second line of the entry.

SYMBOLS: Status denoted by symbols may change at any time after publication of this edition. See page following foreword.

CALL LETTERS: Letters and/or numerals used for station identification purposes. Many countries do not assign call letters to broadcast services, hence the numerous omissions.

SLOGAN: The name applied to a station for identification purposes in lieu of or in addition to call letters. The station name has been reduced in some cases due to space limitations, but the essential elements or abbreviations thereof have been preserved.

OWNERSHIP: The entity, individual or corporate, in whose name the station is licensed and operated.

Journalism 26065 1965 pt. 1, contin
Journalism 26065 used GPO

POWER: Stated in watts. The listed figures are usually authorized power of the transmitter, but in some cases of known deviation the actual operating power has been substituted. When two powers are listed, the figures represent the lower and upper limits of power where a station uses more than one transmitter on the frequency at different times (shortwave), or varies the power of the transmitter for day and night operation (mediumwave).

WAVELENGTH: Stated in meters.

FREQUENCY: Stated in kilocycles per second. Due to propagational conditions, interference by other stations, jamming, malfunction of transmitter, reallocation of frequencies by a country or convention, or for some other reason, stations may use frequencies which are at variance with this publication.

ADDITIONAL INFORMATION: With numerous entries additional information has been included concerning future plans, programs carried, associated stations, network affiliations, etc.

TIME CHART: A table of summer, winter and standard time differences with respect to GMT for each country is appended to Parts I and II.

FOREIGN BROADCAST INFORMATION SERVICE

SYMBOLS

A	alternate frequency
C	under construction
D	daytime operation
E	experimental
F	projected frequency change or addition
I	inactive
J	jumps frequency
M	mobile
N	nighttime operation
O	operates on special occasions only
P	projected (transmitter and frequency)
R	secondary relay station
S	seasonal
T	point–to–point telephone transmitter occasionally used for broadcast purposes
U	unverified information
V	variable frequency
X	no further details available

WORLD TIME IN RELATION TO GREENWICH MEAN TIME

The differences indicate the number of hours ahead of G.M.T. except those marked minus, which indicate the number of hours behind G.M.T. The summer and winter columns are based on seasons of the northern hemisphere.

	Summer time difference	*Winter time difference*	*Standard time difference*
